Hi Karen,

Sorry for the delayed response. The sample you referenced was collected by Cabot and they have included it in the formal reports and data summaries they have provided to us in the past, so I have to believe it is what was submitted to them by their laboratory. I will try to remember to ask them about it next time we have a meeting.

Also, we have 8 hours of time available at our next Tech Services meeting and we would very much like to fill a portion of it with a UIC training/technical guidance presentation led by EPA staff. This is especially of interest considering recent discussions of horizontal wells being considered for injectors. We would also be interested in a mechanical integrity testing overview and the latest forecasts on injection well development in the state. A review of suitable geologic environments would not hurt either, as I know we frequently are asked these types of questions. The meeting is tentatively scheduled for mid- to late-March in either Pittsburgh, Meadville, or Williamsport. Would you and/or your staff be available to conduct this session? I've cc'd our training coordinator, Jim Kline, on this email. Thanks very much!

Seth
